

Commercial Music and Low Voltage Integration

- Needs analysis, visioning , value.
- Systems design , sales, installation, and training.
- Simplified controls ensure proper usage by staff.
- Music | Lighting Control | Security Cameras | Control.

Sound and Lighting: A Crestron lighting and DBX sound system controlled from an iPad includes hanging pendant and flushmount speakers adaptable to the space.

Manage and schedule zones of audio from an iPad. Control multiple TVs and multiple DirecTV feeds seamlessly along with audio.

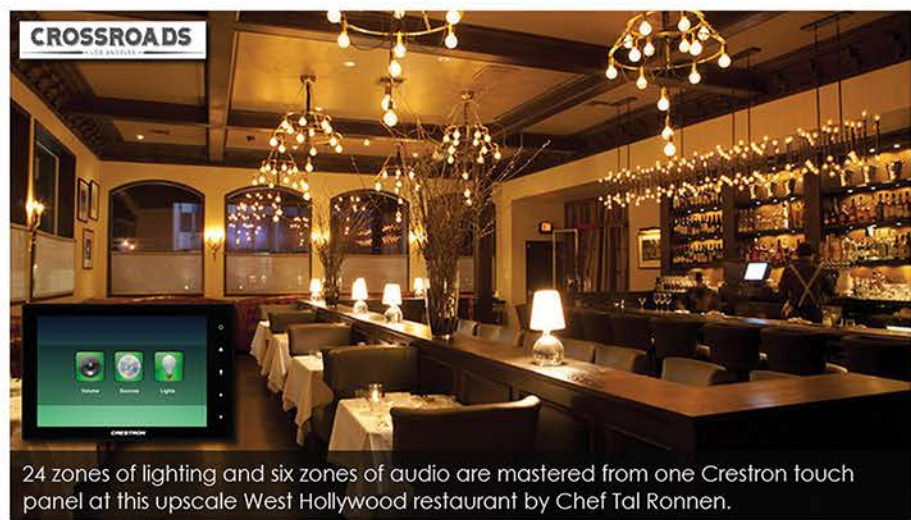

The Border Grill at the Mandalay Bay Hotel uses multiple hanging pendant speakers carefully positioned between the floating slats. In both Upper Dining Room and Bar, speakers and subwoofers are not visible. Not shown is the entire downstairs.

Hanging speakers are placed to deliver even coverage, keeping the walls clean and minimizing reverberation.

Surface mount speakers were recessed into the walls and angled down.

24 zones of lighting and six zones of audio are mastered from one Crestron touch panel at this upscale West Hollywood restaurant by Chef Tal Ronnen.

We'll integrate your components and computer plug-ins, and create out of the box speaker solutions for your Creative War Room, all activated by one button.

This Boardroom with video conferencing and multiple computer plug in points on the table are effortlessly controlled by a Crestron touch panel. Shades, and lighting scenes are also integrated into the touch panel interface.

Among Nike and the U.S. Army as it's clients, this top flight advertising firm uses this presentation room, with flushmount rack (on side wall) to make large scale, multi-channel presentations to it's clients.
